

# HEALTHCARE HYGIENE WITH CONFIDENCE

Scientific approach. Global best practice. Risk reduction.

Tsebo Hygiene Solutions applies the best skills and technology and focus on the prevention of cross contamination, thereby promoting the wellbeing of everybody in the healthcare sector. We call this the Science of Cleaning and Hygiene.

## THE CHALLENGE

Healthcare facilities are highly specialised, high-risk environments.

Each area is classified depending on its level of priority and requires *a hygiene solution that meets its specific needs, with infection control and prevention as a primary focus.* Internally and externally clients have varied expectations of hygienic standards that directly affect their overall healthcare experience.

When you partner with Tsebo Hygiene Solutions you can rest assured that your facility will be equipped with hygiene equipment of the highest grade to maintain hygienic standards. Our supervisors and management perform daily quality checks to ensure staff adhere to strict standard operating procedures and preventive measures. **People are our most important asset and we focus on continually growing and developing them to ensure all our clients enjoy a great customer experience.**

## OUR SOLUTIONS

- Our approach is **flexible and agile**.
- **Global best practice, new methodologies and advanced equipment** deal with current and future needs and demands.
- **Highly systemised processes** and streamlined operations ensure a responsive service and immediate delivery of consistent high-quality service and electronic reporting.
- We partner with suppliers and independent auditors who share our values and drive for **continuous improvement**.
- **Infection prevention practices** are benchmarked at Centre for Disease Control (CDC) levels and ingrained in all standard operating procedures.
- **Standard and specific procedures** prevent cross contamination in low, medium, and high risk areas.
- **Our response is rapid** to current demands such as COVID-19 preventive and responsive cleans.
- Allocation of competent staff and the use of dedicated equipment in high-risk areas guarantees **risk reduction** for your business.
- **Our competent and confident work force** are well trained for the specific areas they clean.
- Ongoing training and awareness ensures a **well-informed and educated team** with an understanding of COVID-19 and the importance of infection prevention.
- Management teams follow a **innovative, hands-on approach**, implementing electronic servicing reports with the click of a button.
- A hygiene and pest control solution **customised to your premises**. HACCP standards and requirements implemented.
- Our consumables are **SABS approved** and of a healthcare standard.
- **Specialised germicidal ablation deep clean** that targets urinals, basins, toilets and showers.
- **Deep clean** controls bacteria build up and prevention of cross contamination.
- Hygienic measures provide comfort and peace of mind to staff and visitors.
- Pest control service **protects humans from pathogens** that are spread by pests such as rats, flies and cockroaches.
- Our hygiene service offering includes, hygiene dispensers, sanitisers and a wide range of certified and approved products. **Our sanitisers and disinfectants are effective against a wide range of viruses, bacteria and fungi.**
- Regular client surveys and interaction with clients ensure that we are aligned to and exceed, their expectations. Audits are conducted by the management team.
- **Our people** are our most important asset. Specific training and development plans include soft skills and management development.
