

# SPECIALISED PEST CONTROL SOLUTIONS

**Professional service. Fast and effective. Results guaranteed.**

Tsebo Hygiene Solutions' range of specialised pest control services is a safe and effective way to control nuisance pests. We remove unhygienic pests from vacant buildings prior to re-entry and prevent the spread of germs by pests. Each service is tailored to specific circumstances, and uses only high-quality devices and registered pesticide products, ensuring that the pests will be eradicated to provide a clean pest-free environment.

## THE CHALLENGE

The human environment, including buildings such as offices, schools and production facilities often create ideal living conditions for pests.

When these buildings are closed and unused for extended periods of time, nuisance pests such as rats, mice and cockroaches may breed and infest at an alarmingly increased rate.

Pests often carry pathogens that cause diseases and allergic reactions. They can damage stored products, packaging materials and paper, electrical wiring and can even cause structural damage. This is exacerbated by a lack of human intervention and disruption. Upon reopening of businesses and schools, pests that established breeding nests will need to be removed to ensure a safe and hygienic environment.

## OUR SOLUTIONS

To prevent pest infestations causing harm to our health, products, equipment and the environment, an effective strategy must be followed to remove problem pests.

**Tsebo Hygiene Solutions offers the following services:**

### RATS AND MICE

- Baiting, trapping and removal of rats and mice
