

INFORMATION TECHNOLOGY CLEANING SOLUTIONS

Hygienically safe. Proven results.

Tsebo Cleaning Solutions' specialised cleaning we take care of all your information technology (IT) cleaning requirements whether you are in an office, construction, industry, or school environment. We make use of specialised equipment, highly trained staff and certified chemicals to provide you with deep-cleaned and hygienic results.

THE CHALLENGE

Dust, dirt and bacteria.

Cleaning your computer and its components and peripherals will keep everything in good working condition. It prevents germs from spreading and allows proper air flow.

The computer key board is usually the most germ infected item in your home or office and may contain more bacteria than your toilet seat. Cleaning it removes dangerous pathogens and keeps the keyboard working properly. Cleaning the case will keep it looking new. Ventilation slots can also be cleared to enhance steady air flow and keep components cool.

Dust is not only unattractive, it can potentially damage or even destroy your computer. Cleaning it regularly will keep it working properly and will avoid expensive repairs.

OUR SOLUTIONS

We offer specialised cleaning solutions for:

Computer screens and keyboards

Laptop computers

Head sets

Copier machines

Telephones

Cleaning and hygiene beyond the obvious
