

WAREHOUSE CLEANING SOLUTIONS

Scientific approach. Global best practice. Risk reduction.

When it comes to cleaning a warehouse, you'll wonder how you ever managed without Tsebo Cleaning Solutions. We use advanced, innovative equipment combined with professional cleaning methods and quality management processes to deliver prompt, hassle-free and proven results.

Addressing the ongoing challenges of maintaining operational continuity while ensuring the safety and cleanliness of our workplaces for both staff and clients is crucial. Tsebo has developed tailored cleaning protocols specifically designed for these contexts, incorporating frequent disinfection of high-touch surfaces and structured cleaning schedules.

In addition to these measures, our comprehensive solutions encompass preventive pest control strategies. We conduct thorough assessments of each client's premises and requirements to ensure the deployment of appropriate products that strike the optimal balance between effectiveness and cost-efficiency.

Our overarching goal is to establish environments that are not only safe, hygienic, and free of pests but also minimise any disruptions to your workforce, bottom line, and environmental footprint.

THE BENEFITS

- ✓ A warehouse that is in a presentable condition all year round
- ✓ Fixed monthly rate on scrubbers
- ✓ Daily active feedback on completed cleaning
- ✓ Pest free environment
- ✓ The correct use of PPE

Cleaning and
hygiene beyond
the obvious

THE CHALLENGE

Managing a warehouse is challenging, especially keeping it clean amidst constant activity and movement of people and machinery.

Let Tsebo Cleaning Solutions alleviate that burden for you. We carefully assess the dynamics of your operation, considering activities in different sections, and tailor our cleaning solutions and schedules accordingly, providing a customised solution specific to your site.

Our robotic scrubbers offer real-time updates and information so that the client knows exactly where the machine operated, how long it has cleaned, and what the battery status is. Should the machine need to be serviced or removed from site, we will provide a replacement machine to ensure that cleaning continues without any disruptions.

Our robotic scrubbers provide clients with real-time updates, detailing the machine's operational locations, cleaning duration, and battery status. In case of servicing or relocation, we offer replacement machines to ensure uninterrupted cleaning operations.

Additionally, neglecting preventive pest control measures could severely impact your product quality and brand reputation.

OUR SOLUTIONS

- Office, ablution, and change room cleaning
- Warehouse cleaning
- Shelf cleaning (utilising various access methods for thorough cleaning)
- Overhead beam and structure cleaning
- Floor cleaning

Our Integrated Pest Management (IPM) system provides a systematic, tailored approach for effective and sustainable pest control management:

- Prevent costly damage to equipment and appliances
- Safeguard warehouse stock from damage
- Minimise productivity loss due to spread of communicable diseases among employees
- Offer continuous housekeeping and maintenance feedback to ensure best practices in reporting, managing, and preventing infestations
